SpaceRocketFloki – BSC

0xb6f79cd1c8d59b7edc3b58672042f2f862027cd4

Total Supply – 10,000,000,000,000 (at the time of launch)

Contract Link – <https://bscscan.com/address/0xb6f79cd1c8d59b7edc3b58672042f2f862027cd4>

Compiler version – v0.8.7+commit.e28d00a7

Optimization Enabled – Yes with 200 runs

Start block – 13280154

Contract deployer's address – 0x1021cdf20acba79a695ee94c62de7545a445d699

Security Issues:

High severity:

None

Medium severity:

The maximum transaction amount can be changed by the owner.

Any wallet can be blacklisted from selling.

Low severity:

The marketing, buyback, developer and liquidity fees can be changed by the owner.

Issue Checking Status:

1. Compiler errors: **Passed**
2. Race conditions/Reentrancy: **Passed**
3. Possible delays in data delivery: **Passed**
4. Front running vulnerability: **Passed**
5. Timestamp dependence: **Passed**
6. Integer Overflow and Underflow: **Passed**
7. DoS with revert: **Passed**
8. DoS with blocklimit: **Passed**
9. Methods execution platform: **Passed**
10. Economy model of smart contract: **Passed**
11. Impact and exchange rate of logic: **Passed**
12. Private user data leaks: **Passed**
13. Malicious event log: **Passed**
14. Hidden malicious functions: **Passed**
15. Scoping and declaration: **Passed**
16. Uninitialized storage pointers: **Passed**
17. Arithmetic accuracy: **Passed**
18. Design logic: **Passed**
19. Cross-fall race conditions: **Passed**
20. Proper openzeppelin contract implementation and usage: **Passed**
21. Fallback function safety: **Passed**

What was the thought process behind the Space Rocket Floki smart contract? Why this contract over any other?

We built the smart contract to serve the specific needs of Space Rocket Floki using tokenomics that we believe are the best fit to make our project move forward. Marketing, automatic liquidity, reflections and developer taxes speak for themselves. Besides that we have seen the buyback wallet work wonders for other projects and we also wanted funds to be able to run community competitions and giveaways!

Is your team renouncing ownership? Explain why or why not, and how it would be beneficial.

Our team will not be renouncing ownership because we don't believe it would be beneficial for the project. We want to be able to adapt to any new situations even if that means redeploying into a new contract or making changes to the current one - even if the contract serves its purposes now it is impossible to predict what the future might hold for us. For example if we want to get listed on a big exchange sometime in the future we want to be able to redeploy to a new contract and adapt it to the requirements of the exchange.

Does your team have experience within the DeFi environment? Are you prepared to run this project diligently?

Our team of developers have experience in developing high-quality dapps for different projects, they have decided to remain anonymous for the moment being - but they have discussed coming forward and talking about their previous experience at a later time of the project, it is not set in stone though. Everyone in the team has some kind of experience in the DeFi environment, some as a community manager, some with marketing, some with coding etc. We are more than prepared to run this project very diligently. We plan to run this project in a more serious manner than the majority of new cryptocurrencies on the BSC.

Please explain your team's choices in distributing Space Rocket Floki upon launch and how you believe it will be beneficial to the project.

We have chosen to distribute 51% to the Pcs LP, and 29% for the presale. The remaining 20% is split between the staking wallet, marketing wallet, buyback/competition wallet and team wallet. SRF's main focus is the Staking platform and we need to set aside a good amount of coins to create a WSRF - WSRF pool where investors will be rewarded WSRF for staking WSRF. Marketing is one of the biggest keys to growing a cryptocurrency so we believe distributing tokens to the marketing wallet will ultimately help us grow. Keeping coins in the buyback/competition wallet will help us host exciting giveaways and competitions that will keep the community engaged! We gave a lot of thought to how we would distribute our coins and I believe we have chosen the most beneficial way to distribute SRF.
