KittyNinja – ETH

0x2d7a3accbe5f0402a9dd9657dae8281ac30fa1d4

Total Supply – 10,000,000

Contract Link – <https://etherscan.io/token/0x2d7a3accbe5f0402a9dd9657dae8281ac30fa1d4>

Compiler version – v0.8.4+commit.c7e474f2

Optimization Enabled – Yes with 200 runs

Start block – 13998119

Contract deployer's address – 0xc8f07327fd083a89bed97be52fdb863609b9560

Security Issues:

High severity:

None

Medium severity:

The max transaction can be changed by the owner.

The owner can blacklist any address.

Low severity:

None

Issue Checking Status:

1. Compiler errors: **Passed**
2. Race conditions/Reentrancy: **Passed**
3. Possible delays in data delivery: **Passed**
4. Front running vulnerability: **Passed**
5. Timestamp dependence: **Passed**
6. Integer Overflow and Underflow: **Passed**
7. DoS with revert: **Passed**
8. DoS with blocklimit: **Passed**
9. Methods execution platform: **Passed**
10. Economy model of smart contract: **Passed**
11. Impact and exchange rate of logic: **Passed**
12. Private user data leaks: **Passed**
13. Malicious event log: **Passed**
14. Hidden malicious functions: **Passed**
15. Scoping and declaration: **Passed**
16. Uninitialized storage pointers: **Passed**
17. Arithmetic accuracy: **Passed**
19. Design logic: **Passed**
19. Cross-fall race conditions: **Passed**
20. Proper openzeppelin contract implementation and usage: **Passed**
21. Fallback function safety: **Passed**

What was the thought process behind the Kitty Ninja smart contract? Why this contract over any other?

The thought process behind this smart contract was the adjustable taxes, router clog avoidance, and automatic anti-bot system. Since this was a hyped launch we needed that.

Is your team renouncing ownership? Explain why or why not, and how it would be beneficial.

We are not renouncing ownership just yet due to the planned CEX listings and further utility implementations.

Does your team have experience within the DeFi environment? Are you prepared to run this project diligently?

The team has worked on several 8 figure market cap projects before, we have what it takes to get this off the ground and take it to nice places.

Please explain your team's choices in distributing Kitty Ninja upon launch and how you believe it will be beneficial to the project.

The initial private sale distribution has helped us raise liquidity while also giving us long term partnerships which kept this token sustainable in this harsh market.
