**What was the thought process behind the Lucky Cat smart contract? Why this contract over any other?**

We wanted to make a fork of baked beans with low fees with multi chain and multi token support.

**Is your team renouncing ownership? Explain why or why not, and how it would be beneficial.**

Renouncing ownership is not required because there are no functions specifically for the owner.

**Does your team have experience within the DeFi environment? Are you prepared to run this project diligently?**

The LuckyCat team has over a year of experience in running DeFi projects. We are fully prepared to support LuckyCat across 6 chains.
